About Me

After finishing my degree, I was not sure what direction to head. At first, I thought of going into Data Analysis, but, when one of my courses I was taking to get into the field included a section on Python for Machine Learning, I knew I had to be a developer. Since beginning my programming journey, I have taken many courses and built many solo projects. I have since developed my skills in JavaScript, HTML, CSS, Node, and React.

Technologies and Languages

- **Programming Languages:** Python, JavaScript, HTML, CSS
- **Frameworks:** React, Bootstrap, NodeJS
- **Tools:** SQL, Git, Github

Education

- **Google Data Analytics Prof. Cert.**, Google **Oct 2021**
- **B.Sc. Economics**, Towson University, Towson, MD **June 2019**

Projects

- **[Photography Site](#) ([Live Site](#)) (React):** This site was built in React and uses Material UI components to display photography. Uses hooks to filter by category and user selection.
- **[React Pokédex](#) ([Live Site](#)) (React):** This was built using React with hooks after retrieving the data from the Pokémon API. Users can select and search for Pokémon and brings up information for their choice.
- **[Portfolio](#) (JS):** Features include a dark mode and contact sheet implemented in JavaScript. The site is built from the ground up with HTML, CSS, and Bootstrap.
- **[Will it Rain Today?](#) (API):** Used open weather and Twilio APIs to check the weather for a given location, and send you a text if it is going to rain that day.
- **[Various CodePen Projects](#) (Misc):** A collection of small projects, such as a drawing app, BMI calculator, random quote generator, background color changer, and CSS styling examples.
- **[Sentiment Predictor](#) (Machine Learning):** Cleaned raw text review data for machine learning, split data into test and training sets, and built Random Forest Classifier which evaluated to 74% accuracy.
