ABOUT ME

After graduating, I didn't know what direction to head. After working several gig jobs and contract work, I found the field of data analytics. Since then, I have committed everything I have to learning the tools needed to break into the field through courses and personal projects. I have experience working with data in Excel, querying with SQL, visualizing in Tableau, and have taken a particular interest in Python libraries such as Pandas, NumPy, Matplotlib, and Seaborn.
