About Me

I am a full stack developer who works primarily with React and NextJS, however, I consider myself to be platform agnostic. Different technologies work better with different projects, so it is important to have exposure to many different things. I also have experience writing code in Python for automation.

Technologies and Languages

- **Programming Languages:** Python, JavaScript, TypeScript, HTML, CSS
- **Frameworks:** NextJS, React, Bootstrap, NodeJS
- **Tools:** SQL, Git, Github, MongoDB, Prisma

Education

- **Google Data Analytics Prof. Cert.**, Google   **Oct 2021**
- **B.Sc. Economics,** Towson University, Towson, MD   **June 2019**

Projects

- **[Gardienne] ([Live Site]) (Full-Stack):** Gardienne helps users manage their plants' watering times and improve their health by sending reminders and suggestions. It uses NextJS, TypeScript, React, NextAuth for user authentication, NodeJS, Prisma, and a MongoDB database for storing user information.
- **[Photography Site] ([Live Site]) (React):** This site was built in React and uses Material UI components to display photography. Uses hooks to filter by category and user selection.
- **[React Pokédex] ([Live Site]) (React):** This was built using React with hooks after retrieving the data from the Pokémon API. Users can select and search for Pokémon and brings up information for their choice.
- **[Portfolio] (JS):** Features include a dark mode and contact sheet implemented in JavaScript. The site is built from the ground up with HTML, CSS, and Bootstrap.
- **[Various CodePen Projects] (Misc):** A collection of small projects, such as a drawing app, BMI calculator, random quote generator, background color changer, and CSS styling examples.
- **[Sentiment Predictor] (Machine Learning):** Cleaned raw text review data for machine learning, split data into test and training sets, and built Random Forest Classifier which evaluated to 74% accuracy.
