Curtis Bowser

Front End Developer

SUMMARY

I am a front-end developer who works primarily with React and NextJS, however, I consider myself to be platform agnostic. I make effective and performant websites for clients using Tailwind for styling and NextJS for static site generation. All of my designs include a headless CMS for editing content.

WORK EXPERIENCE

Freelance Web Developer at Beachside Design, Salisbury, MD

April 2023 — Present

- Designed client sites to increase outreach and sales by providing performant sites with good SEO.
- Worked with clients to plan out designs that incorporate their brand identity.

Recent Projects:

Design Portfolio (Live Site) (NextJS) – This is a design portfolio template built with NextJS, React, Tailwind, and a headless CMS deployed on Netlify. Owners can edit their own content and they also get a website with a Lighthouse Score over 95% in all categories.

Beachside Design (Live Site) (NextJS) – This project advertises static website development services to local businesses. The website also provides information about the many benefits of having a site to local businesses. It is fully responsive, has a working contact form, and is deployed with Netlify.

Front End Developer at Self-Taught, Salisbury, MD

January 2022 — March 2023

- Built modern and responsive web applications using best practices
- Built semantically structured full-stack web applications
- Used Git and GitHub to manage many projects while continuing their development

Recent Projects:

Gardienne (Live Site) (NextJS) – Gardienne helps users manage their plant's watering times and improving their health by sending reminders and suggestions. It uses NextJS, TypeScript, React, NextAuth for user authentication, NodeJS, Prisma, and a MongoDB database for storing user information.

Photography Site (Live Site) (React) – This site was built in React and uses Material UI components to display photography. Uses hooks to filter by category and user selection.

Portfolio (JS) – Features include a dark mode and contact sheet implemented in JavaScript. The site is built from the ground up with HTML, CSS, and Bootstrap.

Other Projects: Sentiment predictor, a drawing app, BMI calculator, random quote generator, and background color changer.
